

Topics

- Create a simple word document
- Include a photograph (if possible)

Background Information

It's nice to get to know students. Use this opportunity to introduce yourself to me

Instructions

IMPORTANT: Complete the below steps in the order they are given. Completing the steps out of order may complicate the assignment or result in an incorrect result.

1. Create a blank Word document on your computer
 - a. **Write a brief introduction to me about yourself (see my example below).**
2. Include a photograph of you if you have one.
3. Submit this in the participation folder on cs101.wvu.edu.

Sample Introduction:

My name is Robert Phipps. I've been teaching CS101 on campus and via distance since 2002. I have an undergraduate degree from Shepherd University, and a master's degree from West Virginia University. In addition to teaching CS101, I am a professional technologist for the Eberly College at WVU. I provide desktop support to many of the units of Eberly. What that means for me is that I often get to see the practical implications of what I teach in the classroom.

I live in Fairmont with my wife and five year old son (so phone calls after 8 pm make me cranky). I love to read mystery novels - it's a great break from the doing IT work and teaching. I especially love Donna Leon's Commissario Brunetti novels, Margaret Maron's Judge Knott series, and Martin Walker's Bruno, Chief of Police books. When I'm not deep in a novel, or playing playground cop for my son, I'm busy plotting of my next trip to Disney World and avoiding the stairs
